DEFECTOSCOPY

THE SOVIET JOURNAL OF NONDESTRUCTIVE TESTING

A translation of *Defektoskopiya*

Number 1 January-February, 1965

CONTENTS

	Engl./Russ.	
From the Editors	iii	3
ELECTROMAGNETIC METHO		
Theory of the Loose-Contact Probe Used in Tests Based on Eddy Currents—V. S. Sobolev	1	6
Electromagnetic Processes in a Conducting Plate Subjected to Pulsed Magnetic Fields —A. I. Kadochnikov	9	15
Magnetographic Testing of Welded Steel Joints in Long-Distance and Other Pipelines —A. S. Fal'kevich	13	19
Method of the Applied Field in Ferroprobe Testing of Tube Blanks for Surface Defects —N. N. Zatsepin and V. E. Shcherbinin	19	28
Investigation of the Defect Fields in High-Speed Electromagnetic Testing of Rails —B. P. Dovnar and V. A. Shcherbinina	23	32
Quality-Control of Small Stampings for Magnetic Circuits—G. S. Korzunin and R. I. Yanus	29	40
ULTRASONIC METHODS		
Some Features of the Acoustic-Impedance Method in Defect Detection—Yu. V. Lange	32	44
New Reference Standards for Ultrasonic Nondestructive Testing. I.—G. S. L'vov and L. V. Chuev	40	53
X-RAY AND GAMMA-RAY METHODS		
Reference Standards of Resolution by X Raying and Gamma Raying—M. Ya. Balazovskii	43	57
METHODS OF STRUCTURAL ANALYSIS		
Magnetic Properties, Electrical Conductivity and Hardness of Rail Steel M75 After Isothermal Hardening and Tempering—G. S. Tomilov and V. I. Matveev	55	72
The Use of AC for Structural Analysis of Ferromagnetic Materials by the Electric-Resistance Method—N. G. Shul'ga and M. F. Zamora	64	82
Some Features of Nondestructive, Magnetic Quality Control of Hardened and Tempered Bearing Components Produced from Ball-Bearing Steels—L. D. Vasil'eva, M. F. Pomukhin, G. S. Tomilov, and V. A. Utkina	68	86
DISCUSSION		
"Nondestructive" and "Nondamaging" Inspection Methods—Yu. A. Vdovin, V. V. Vlasov, N. N. Zatsepin, I. E. Korobeinikova, M. N. Mikheev, N. M. Rodigin, G. S. Tomilov, D. A. Shturkin, and R. I. Yanus	71	90
REVIEWS AND BIBLIOGRAPHY		
Nondestructive Methods of Quality Control of Materials and Components —V. E. Shcherbinin	72	91

INFORMATION
Review of Dissertations on Defectoscopy—A. S. Sergeev 75* 94

Number 2 March-April, 1965

New Instruments and Methods—Into the Technology of Production 111* 3
Unsolved Problems of Induction Flaw Detection—A. L. Dorofeev 112 4
The Durability of Manufactured Articles—Of Major Importance—M. F. Pomukhin, L. D. Vasil'eva, and V. A. Utkina 114 6

ULTRASONIC METHODS
Investigation of the Directivity of Prismatic Transducers—D. B. Dianov 115 8
Excitation of Rayleigh Waves by Means of a Prismatic Transducer—D. B. Dianov and N. P. Serebrennikova 129 22
A Radiator for Ultrasonic Flaw Detection with Uniform Sensitivity in the Near Zone—A. S. Golubev 133 27
A Generator with a System of Inductively Coupled Impulse-Excitation Circuits—S. E. Baryshev 136 30
Voltage Calibrator for an Ultrasonic Flaw Detector and Its Uses—S. E. Baryshev, A. I. Litvintsev, and I. V. Mikhailov 141 36
Piezoelectric Ceramics for Ultrasonic Transducers—G. S. Il'in 143 39
Sensitivity Characteristics of Ultrasonic Flaw Detectors—A. Z. Raikhman 148 44
Apparatus for the Ultrasonic Structural Analysis of Metals and Welded Joints—N. V. Khimchenko and V. N. Prikhod'ko 151 47
Ultrasonic Testing of the Structural Parameters of Hardened Metal—G. V. Zarochentsev and I. N. Yushkevich 158 56

ELECTROMAGNETIC METHODS
Magnetization Conditions in the Combined Inspection of Parts by the Magnetic-Powder Method—A. V. Zhigadlo and V. V. Korsakov 165 66
Dynamics of the Magnetic Reversal of Ferromagnetic Plates—G. A. Burtsev 170 72
Magnetic Permeability of a Section of Ferromagnetic Material Being Magnetically Reversed by an Alternating Magnetic Field—I. I. Kifer and V. S. Fastritskii 176 80

BRIEF COMMUNICATIONS
Electromagnetic Introscope for Visualizing the Magnetic Relief of Metal Articles—K. M. Klimov 182 87
Instrument for Automatic Quality Control of Heat Treatment—M. N. Mikheev, B. M. Neizvestnov, V. N. Frantsevich, and G. V. Surin 184 89
How Does one Detect Cracks in the Bearing Structures of Tower, Gantry, and Bridge Cranes—I. E. Korobeinikova 186 90
A Method of Transport for Cores of High-Permeability Materials—V. M. Frantsevich 187 91

INFORMATION
Survey of Dissertations on Problems of Flaw Detection—A. S. Sergeev 188 92
Patents—A. V. Kuznetsov 191 94

*The January-February issue of Defectoscopy, a joint translation of Consultants Bureau and Scientific Information Consultants, replaced an earlier translation of the same material in a somewhat different format, causing this discontinuity in pagination—Publisher's note.

Number 3 May-June, 1965

Engl./Russ.

ULTRASONIC METHODS

Automatic Ultrasonic Flaw Detection in Coarse-Structured Materials—Yu. M. Rapoport 197 3

Ultrasonic Inspection of Wrapped Soldered Tubing—A. T. Nikolaenko, V. I. Teverovskii, Ya. F. Anikeev, and V. F. Spil'nik 201 7

Automatic Flaw Detection in a Longitudinal Joint in Electric Butt-Welded Pipes—V. I. Starokol'tsev. . . . 206 13

Ultrasonic Instrument for the Quality Control of Welded Joints in Thin-Walled Rustproof Pipes—Ya. F. Anikeev, V. I. Teverovskii, A. I. Butenko, and Yu. I. Samsonov 211 18

Construction and Production Technology of Search Heads—S. V. Veremeenko 217 25

ELECTROMAGNETIC METHODS

The Magnetic Field of Flaws Flown-Around by Direct Current—G. A. Byuler 222 32

On Increasing the Selectivity of Ferroprobe Control of Ferromagnetic Articles for Extended Surface Flaws—N. N. Zatsepin, G. A. Burtsev, and V. E. Shcherbinin 228 37

Magnetic Methods and Instruments for Monitoring the Structure of Castings of Spheroidal Graphite Iron—V. A. Ivlev and I. I. Kostetskii 232 43

Spectral Density of the Electric Signals Induced in Induction Data Transmitters by Magnetic Fields of Defects of the Linear-Dipole Type—Yu. K. Fedosenko 241 53

Calculation of the Effect of a Conducting Sphere on a Current-Carrying Coil—V. S. Sobolev and M. G. Zershchikova 247 60

Calculation of the Impedance of Coils Placed Above a Conducting Ferromagnetic Half-Space—I. I. Kifer, V. S. Fastritskii, and B. A. Mirman 249 62

New Phase-Sensitive Eddy-Current Method of Detecting Surface Cracks in Metal Products. I. Physical Principles—V. V. Vlasov and Yu. S. Subbotin 257 71

New Phase-Sensitive Eddy-Current Method of Detecting Surface Cracks in Metal Products. II. Construction of Flaw Detector—V. V. Vlasov and Yu. S. Subbotin 262 77

IMPREGNATION METHODS

Characteristics of the Penetrability of Fluids for Fluorescent and Chromatic Flaw Detection—E. A Filimonova 269 86

X- AND γ-RAY METHODS

The Use of Large Focal Lengths in X-Ray Flaw Detection—M. Ya. Balazovskii 274 92

INFORMATION

Method of Inspecting Welds. British Patent No. 933701, Class 37E, 1963—Reviewed by A. P. Kuznetsov . . 276 95

In Memory of Sergei Tikhonovich Nazarov 277 96

Number 4 July-August, 1965

ELECTROMAGNETIC METHODS

Instrument for Automatic Detection of Welds in the Production Line During Endless Rolling—G. M. Kukhtevich 281 3

Eddy Currents in a Thin Nonmagnetic Plate Moving Relative to Point Magnetic Poles—Yu. K. Fedosenko 286 8

Simulation of the Performance of Eddy Current Flaw Detectors by Means of Electrically Conducting Paper—V. V. Sukhorukov 293 16

Contribution to the Theory of Multielement Ferroprobes—G. A. Burtsev 300 23

Determination of the Operating Conditions of Laid-On Probes Located Above a Ferromagnetic Half-Space—I. I. Kifer and V. S. Fastritskii 308 32

Radiographic Introspection of Complex-Profile Solids—V. N. Rudakov and M. G. Aleksandrova 313 38

Effect of the Natural Frequency of the Data Unit on the Measurement Accuracy in Inspection Based on the Eddy Current Method—G. M. Kukhtevich 315 40

ULTRASONIC METHODS

Data Accumulation Unit for Improving the Reliability of Automatic Ultrasonic Flaw Detectors—V. G. Sloushch 319 45
Automating the Interpretation of the Results of Ultrasonic Testing—G. A. Krug 323 49
Mechanized Ultrasonic Apparatus for the Inspection of Aluminum Alloy Sheet by the Method of Normal Modes—S. E. Baryshev, N. A. Bespalov, Z. N. Shan'kova, and V. K. Krasota . 328 56
Investigation of Inhomogeneity in the Crystal Structure of Ge and Si in Terms of the Ultrasonic Velocity in Different Sections of the Crystal—S. N. Baranovskii, D. V. Sheloput, and D. D. Berezikov 332 60
Determination of the Optimum Sensitivity of Ultrasound Flaw Detectors and of the Norms for Estimating the Quality of Welded Joints—A. Z. Raikhman and I. N. Ermolov 336 65

X-RAY AND γ-RADIATION METHODS

Applicability Range of the Sensitivity Equations—M. Ya. Balazovskii 346 78

BRIEF COMMUNICATIONS

Use of Nondestructive Methods for Inspecting the Quality of Tubes and Industrial Tools —L. V. Kokhman 351 84
Negatoscope for Scanning Industrial X-Ray Pictures—M. Ya. Balazovskii 353 85

INFORMATION

Review of Dissertations on Problems of Defectoscopy—A. S. Sergeev 354 86

REVIEW OF PATENTS

[USA Patent No. 3097522 Class 73-67.6, 1963 ..... 91]
[USA Patent No. 2938162 Class 324-37, 1960. Nondestructive Method of Inspection by Television ..... 91]
[USA Patent No. 2740289 Class 73-67, 1956. Automatic Scanning and Recording Device for Ultrasonic Inspection of Materials ..... 92]
[USA Patent No. 2925552 Class 324-37, 1960. Mechanism for Detecting Defects in Rails ... 93]
[USA Patent No. 3074268 Class 73-67.5, 1963. Compensation of Temperature upon Passage of Ultrasound in a Liquid ..... 95]

NOTE

The Table of Contents lists all material that appears in the original Russian journal. Items originally published in English or generally available in the West are not included in the translation and are shown in brackets. Whenever possible, the English-language source containing the omitted items is given.

Number 5 September-October, 1965

ULTRASONIC METHODS

Ultrasonic Inspection for Macrodefects and Local Structural Irregularities in Turbine Blades —A. P. Rumyantsev, L. R. Fedorova, N. A. Kravchenko, L. D. Tararoeva, and I. V. Krichevskaya 361 3
Investigation of the Sound Channel of a Shadow Defectoscope for Inspecting Thin Rods —V. P. Vlasenko 366 8
Transmission and Reflection of an Ultrasonic Pulse for a Plane-Parallel Plate in a Liquid —L. G. Merkulov and V. M. Verevkin 371 13
Ultrasonic Method of Investigating Porous Media—E. V. Nesmashnyi and E. D. Pigulevskii 380 22

RADIATION METHODS

Application of Radio Waves in Flaw Detection—V. P. Kovalev and M. G. Kuznetsov. 383 25
Infrared Method of Detecting Hidden Flaws in Resistors—N. A. Bekeshko and P. K. Oshchepkov. . . 388 30
Flaw Detection in Building Materials and Structures by Means of Betatron Bremsstrahlen —V. A. Vorob'ev. 391 33
High-Efficiency Betatron Flaw-Detector with Scintillation Counters for the Inspection of Very Thick Welded Joints—V. I. Gorbunov and A. V. Pokrovskii 395 38
Effect of Light Reflected from the Surface of a Radiographic Plate on the Perception of an Image Element—M. Ya. Balazovskii. 400 44

ELECTROMAGNETIC METHODS

Theoretical and Experimental Investigations of Certain Types of Feed-Through Sensors —V. G. Gerasimov and L. A. Chernov. 402 47
The Effect of the Depth of the Decarburized Layer of Ball-Bearing Steel on the Impedance of a Feed-Through Coil—A. Ya. Rachok, V. V. Levitin, and N. K. Kovalenko. 412 57
Conversion Characteristics of a Ferro-Probe when Measuring Nonuniform Magnetic Fields —R. Ya. Berkman and V. V. Belous'ko 415 61
Transistorized Flaw Detector with Ferromagnetic Probe—V. M. Ogurtsov, V. M. Frantsevich, and D. A. Shturkin. 421 67

DISCUSSIONS

Quality Criteria in Production Flaw Detection—G. A. Burtsev 427 74

BRIEF COMMUNICATIONS

Etched Surface Ultrasonic Inspection of 30KhGSNA Steel—B. M. Voronevich, A. T. Kubarev, and V. F. Nachvai. 435 84
Flaw Coordinate Template for Ultrasonic Inspection Work—F. Ya. Zaslavskii and N. V. Ryl'skaya. . 436 84
Some Considerations on the Training of Flaw Detection Cadres—N. M. Lysenko. 438 86

INFORMATION

[Sheet Material Inspection Device (US Patent No. 3074267, 73—67.5, 1963). . . . . 87]
[Device for Nondestructive Ultrasonic Quality Control of Materials (West German Patent No. 1160667, 42k 46/06, 1964) . . . . . 87]
[Crack Detector with Magnetic Vibratory Sensor (US Patent No. 3089084, 324-37, 1963). . . . . 89]
[Stationary Scanner in Ultrasonic Materials Inspection (US Patent No. 2787158, 73—67.5, 1957) . . 91]
[Electromagnetic Monitoring Device Using Eccentrically Mountable Scanning Coil with Coil Axis Rotated about Specimen (US Patent No. 3110860, 324—37, 1963). . . . . 92]
[Magnetic Flaw Detector Design with Exciting and Sensitive Coils Mounted on Rocking Head (US Patent No. 3146395, 324-37, 1964) . . . . . 93]
Improving Inspection of Railroad Rails—V. I. Shuvalov 439 94
The DVT-1 Electromagnetic Flaw Detector. 441 95

NOTE

The Table of Contents lists all material that appeared in the original Russian journal. Items originally published in English or generally available in the West are not included in the translation and are shown in brackets. Whenever possible, the English-language source containing the omitted items is given.

Number 6 November-December, 1965

Engl./Russ.

ELECTROMAGNETIC METHODS

Ferroprobe Flaw Detection on Steel Tubes in an External Circular Magnetic Field—N. N. Zatsepin, V. E. Shcherbinin, N. M. Ezhov, L. V. Kokhman, M. K. Novikov, and E. A. Lyubynskii 445 3

Simulation of Problems of Metal Flaw Detection on the EGDA Integrator by the Potential Drop Method—É. I. Brainin and L. Ya. Vinnikov 450 9

On the Design of Contact Pickups with Ferrite Cores—I. I. Kifer and V. S. Fastritskii 456 15

Apparatus for Quality Control of Magnetic-Circuit Stampings—G. S. Korzunin, Yu. A. Vdovin, and R. I. Yanus 463 23

Magnetic Inspection of the Hardening of a Plastically Deformed Surface Layer of Steel Parts —I. M. Shif and B. M. Neizvestnov 466 27

Automatic Instrument for Sorting Cast-Iron Nipples by Hardness—V. A. Bogdanov, S. V. Krasyuk, V. S. Medvedev, and I. G. Sokolinskaya 473 35

RADIATION METHODS

Problems in Radiation Flaw Detection—A. S. Shtan', S. V. Chernobrovov, V. G. Firstov, and A. G. Sul'kin 477 41

Experimental Determination of Film Factor of Scattered Radiation—M. Ya. Balazovskii 482 47

ULTRASONIC METHODS

On Selecting Optimum Parameters of the Echo-Ranging Method of Ultrasonic Flaw Detection —I. N. Ermolov 485 51

The UVFD-1 Flaw Detector for the Inspection of Nonmetallic Laminated Structures and Products —Yu. V. Lange, S. A. Filimonov, N. V. Shishkina, V. V. Pakhomov, S. V. Veremeenko, and B. E. Pyrkov 494 61

Certain Design Features of the DUK-12 Ultrasonic Flaw Detector—N. S. Savorovskii, S. V. Veremeenko, and V. I. Pyatnitskii 500 68

BRIEF COMMUNICATIONS

A Simple Photometer for Radiograms—A. A. Gol'drin 507 77

A Pulse Device for Circular Magnetization of Specimens—G. I. Dmitriev, É. É. Stoinskaya, and D. A. Shturkin 510 79

INFORMATION

International Conference of Isotope Radiography Specialists—A. G. Sul'kin 512 81

[XVIII Congress of International Welding Institute (Paris, 1965) ..... 84]

IV All-Union Forum of Nondestructive Testing Technicians 516 86

BIBLIOGRAPHY

Some Magnetic Inspection Methods —V. Shcherbinin 521 90

ERRATA 522
